

Personal Data Processing

VMC Cloud processes personal data in accordance with applicable Colombian law. The information collected may be used to manage business relationships, respond to inquiries, conduct recruitment processes, carry out marketing activities, send corporate communications, and comply with legal obligations.

Data subjects may exercise their rights to access, update, correct, or request the deletion of their personal information through the communication channels provided by the company.

We are committed to ensuring that the personal data entrusted to us is handled responsibly, transparently, and securely.
